Press Release

## **Well-Marked Low-pressure Area over East-Central Arabian Sea**

The low-pressure area (LPA) over East-Central Arabian Sea has intensified into a well-marked low pressure area (WML) and lay around latitude 17.7 N, longitude 72.5 E, which is about 985 km southeast of Karachi.

Due to favorable environmental conditions, the system is likely to intensify further into a Depression (strong LPA) during next 24 hours and expected to move initially towards north.

Currently, there is no threat to any Pakistani coastal area. PMD's cyclone warning center, Karachi is monitoring the system and will keep the relevant quarters abreast.
